EXPERIENCE

Full Stack Web Development Intern - Ideonix Solutions:

- Developed a full-stack e-commerce platform supporting product discovery, authentication, and user workflows.
- Built responsive UI using HTML, CSS, and JavaScript to improve cross-device usability.
- Implemented backend services using Java (JSP & Servlets) following Object-Oriented Programming principles.
- Designed SQL database schemas for efficient and secure data management.
- Integrated Location and Translation APIs to enhance personalization and accessibility.
- Debugged and resolved issues in frontend and backend modules to ensure smooth application performance.

PROJECTS

- **GroSnap – Smart Grocery Delivery Web Platform:** Collaborated with team members to build a full-stack web application connecting users with nearby grocery stores for online grocery ordering. Implemented location-based shop discovery, product listings, cart and checkout flow, and a seamless user experience using a modern full-stack architecture. Integrated **Tesseract OCR** to convert handwritten grocery lists into editable digital text, enabling quick item input and improving user convenience. Designed application components to support scalable user interactions and efficient database queries.
Tech Stack: Python, Flask, React, Tesseract OCR
